### MAIN FLAMES

With the background painted, the main portion of the flame mask can be removed, but I left the pinstripe border on for now. I

sprayed a yellow and white fade for the center of the flames. I could have painted the pinstripes first, but I chose to work on the main flames because I can better control bleeding in the pinstripe mask..

## 8

### PINSTripES

All that is left to do is the pinstriping. I used orange backed with white.

### CONCLUSION

Precut masks are a time-saving and simple way for anyone to achieve a custom-painted look. As always, if you plan and take your time, then your next body might be your best. Keep the paint flowing! ■

### Ps eXtreme Car Body Paint Standz

Unless you actually like painting your fingertips every time you paint a body, eXtreme Standz new eXtreme Paint Standz is a great addition to your workshop. It's made of high-impact polystyrene, with stainless-steel rods and hardware. The four rubber coated posts are individually adjustable to hold any size car body from the outside for painting and from the inside for decal or trim work. The multijointed "neck" allows the stand to hold the body at virtually any angle, and the base has a tray with molded dividers for holding your paint supplies.
